## DIAMONDS & PRECIOUS MATERIALS

The precious stones and diamonds are selected with utmost care; each diamond presents an ideal balance of colour, clarity, cut and carat weight – the “four Cs” that determine its value – and meets the strictest ethical guidelines. Even for the smallest diamonds, Furrer-Jacot will guarantee Top Wesselton VS quality. Yellow, white or rose gold, platinum or palladium: only these three precious metals are used in the Furrer-Jacot collections. Each one is a specific alloy, of a density that guarantees the total absence of porosity. In keeping with its standards, the House uses 750/1000 (18 carat) gold, 950/1000 platinum and 950/1000 palladium exclusively.

All Furrer-Jacot pieces are made one by one in Schaffhausen, Switzerland, and each one is stamped with the House’s “fj” trademark, which vouches for 100% “Swiss made” quality.

## ENGRAVING & SERVICE

You can bestow your rings with a further personal touch, by having an inscription of your choice engraved, whether by classic machine or laser. Should you so wish, Furrer-Jacot’s skilled craftsmen can personalise your ring by engraving symbols or characters of any language in your own handwriting.

Furrer-Jacot provides a permanent warranty for material and workmanship errors upon your registration on our website (damage as a consequence of an accident, negligent or unsatisfactory care and normal wear and tear is excluded). The House offers a free resizing of the ring after one year, as well as an additional free resizing if you pass the piece of jewellery onto a direct heir. Furrer-Jacot replaces for free any lost diamond weighing up to 0.05 carat.
